Details

Description

This non-required exercise is meant for practicing knowledge with topics in [Module 2.a: Basic Android Development \(Resources, Views, and Layouts\)](https://dlsu.instructure.com/courses/214805/modules/973786) (<https://dlsu.instructure.com/courses/214805/modules/973786>).

Problem

Try to recreate the following layout:

You don't have to replicate the image assets exactly, but to help, you can use the following files: [LayoutPracticeImageResources.zip](https://dlsu.instructure.com/courses/214805/files/26095660/download?wrap=1) (<https://dlsu.instructure.com/courses/214805/files/26095660/download?wrap=1>) [↓](https://dlsu.instructure.com/courses/214805/files/26095660/download?download_frd=1) (https://dlsu.instructure.com/courses/214805/files/26095660/download?download_frd=1)

Instructions

1. Try re-creating the layout shown above in Android Studio.
 - You don't have to copy everything word by word, image by image.

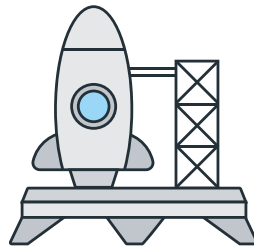

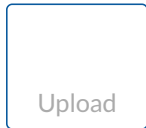

Additionally, there is no behavior to this problem. All views are static.

2. Once done, export your Android Project as a zip file (do not zip your Android Project folder itself)
3. Remember, this practice exercise isn't required. If you'd like to jump to a possible solution, an Android Project will be uploaded to the module after the assessment's module.
