⌄ Details

Description

This is a non-required exercise meant for practicing knowledge with topics in **Module 2.a: Basic Android Development (Resources, Views, and Layouts) (https://dlsu.instructure.com/courses/214805/modules/973786)** .

Problem

Try to recreate the following layout:

Instructions

1. Try re-creating the layout shown above in Android Studio.
   ○ You don't have to copy everything word by word, image by image. Feel free to highlight your own favorite YouTube channel.
2. Once done, submit ONLY the layout XML file
   ○ There is no need to attach the image file you used as long as you're certain the layout file is good.
3. Remember, this isn't required. If you'd like to jump to a possible solution, check out the super_bayani_layout.xml in the LayoutExampleProject Android Project found in **Module 2.a: Basic Android Development (Resources, Views, and Layouts)**
